

MADE TO ORDER BOILERS

From the sparkling new facility left the specially designed Ecopac HWP 5000 destined for a power project within India. This typical superheated-pressurized water boiler of 5.8 MWth has an outlet temperature of 215°C. The entire engineering of the boiler was done by isotex and subjected to rigorous third party inspections. The boiler showcases isotex's capabilities to offer *custom solutions that satisfy the requirements of even the most demanding applications.*

Pressurized water is increasingly becoming popular and replacing thermic fluid or steam as preferred heat- transfer medium in many industries.

Isotex has mastered this new space with the modern design Ecopac water boilers suitable for global markets. The standard Ecopac offers distinct advantages when compared to traditional shell boilers or air-jacketed coil boilers.
